

Roswell update / John Mack / News!

NEW COMPUTER: During the last few weeks Pat has purchased a new CD Rom computer, with a colour printer, which (after he has familiarized himself with it) will enable us to produce a new style format of the IUFOPRA NEWSLETTER. However as it is going to take some time to implement these changes this will be the last issue of the Newsletter for a few months. Please be advised that this is only a temporary arrangement and will not affect the production of the IUFOPRA JOURNAL.

Now that we have acquired a Computer, we are planning to enhance and produce a high quality newsletter over the coming months. What we can tell you is that it will have a new name (IUFOPRA will be included in the title) and a new Logo. So watch this space!

TRANS-UFO: We recently received a copy of an article called "TRANS-UFO". This is a compiled report of translated articles from the Swedish UFO organisation. Produced by Eileen Fletcher this 26 page high quality magazine contains not only UFO reports from Sweden and Russia but has excellent quality photographs as well. It's difficult

If Ray Santilli is to be believed, Flying Saucers will not be secret for much longer! Lets hope he's right - but we won't be holding our breath!

Dont Forget- Roswell Footage airs Ch.4 28/08/1995!

at the best of times, to print and produce a UFO Magazine but it is some task to have to print, produce and translate articles from Swedish to English as Eileen has so painstakingly done here, and she is to be complimented on producing such an excellent report.

A copy of Trans-UFO can be obtained from Eileen Fletcher, Derwent Cottage, Derwent Dam,

Bamford, Sheffield S30 24Q, England.

Please make (Sterling) cheques payable to Eileen Fletcher. The cost of the above is: £3.38 (UK inc post), Europe £3.78 (inc. post), and others £5.00 (inc. post).

ALLEGED ROSWELL FILM - NEW DEVELOPMENTS: A new development has now come to light regarding the 16mm

COULD WE HAVE PERMISSION TO REPRODUCE SOME OF THE ITEMS IN TRANS-UFO FOR OUR JOURNAL? THANK YOU.

Pat/Rue.

IUFOPRA July / August Newsletter

black and white film which we reported on in the last newsletter. It is now widely known that Kodak have denied authenticating the age of the film as being 50 years old and that they have not even seen it or been ordered to do so {Editors note: the 'authentication' came from a Kodak staff member, who verified the age of the film *stock* itself, but not the content}. It is now well known that Ray Santilli is interested in making money from this alleged film. Video tapes of the footage are being offered for sale (to be delivered on or by August 28th) even though it has been leaked that the footage is being released to Tv Networks worldwide, also on August 28th. Bear in mind that Mr. Santilli is not a professional ufologist and is not interested in the honest opinions of many ufologists who have discovered many flaws in it at a recent screening in London and are therefore of the opinion that the alleged film is a hoax. For a detailed, and objective account on the latest Roswell happenings we recommend you buy the July/August issue of Quest International's excellent UFO MAGAZINE which is available from all good newsagents.

JOHN MACK INVESTIGATED: It is sad to see that the eminent Harvard based psychiatrist and Professor, John Mack is the subject of investigation by his colleagues because of his Research into alien abductions es-

pecially those who claimed that they had sex with space creatures.

It seems that before he became involved with abductees he was seen as a highly respected, rational and sane man but once he became involved with Abductees his colleagues immediately decided that he is a little strange and because he takes the time and the trouble to listen sympathetically to Abductees and their experiences, this automatically qualifies him for the "funny farm".

Perhaps they didn't realize that when Professor Mack undertook this research, he was fully aware of the risk he was taking, and that he would eventually lose the respect of his colleagues. Is it fair to investigate a man who for years has been ordinary sane and rational, and now suddenly because his colleagues cannot and refuse to accept that his ideas are a little different from theirs, they decide that it's time he was investigated? His colleagues will tell you that they are doing this because "his research does not meet the University standards for Scholarship. And yet, before John Mack's work with Abductees his research did meet the University's standards for Scholarship. It's like saying that an innocent man is guilty of a crime when everyone knows that he's not.

And what about all the victims of Alien Abduction whom he has helped over the last three years? For many of them, because of the

help given to them by John Mack they can now lead normal lives again.

Could you imagine what would happen to any or all of his colleagues (the very people who are having him investigated) if they were the victims of Alien Abductions and were subject to the traumatic medical and genetic examinations, who would be the first person they would go to because they know that he would believe and help them to come to terms with it? Yes! John Mack the "alleged nutty professor"! I'm willing to bet that the last thing on their mind would be whether or not he warrants investigation, they would be only too happy to go to him with their experience. After all, their fellow scientists wouldn't believe them now would they? I rest my case.

MAY ISSUE OF OMNI: If you were looking for the May Issue of the Omni Magazine, you didn't miss it. It just simply never arrived in Dublin. When we made a few inquiries as to the reason for its non-appearance we were told that the Irish suppliers did not receive any copies of the May Issue at all from America.

So, you should be able to get the May/June issues sometime in early July.

Well as I mentioned earlier this is the last newsletter for a few months so enjoy the long hot summer! and the summer issue of the IUFOPRA JOURNAL will be available soon.
